PROGRESS MADE IN

ARMAMENT NEGOTIATIONS

Washington, Nov. 22 (By the A. P.)—Progress made in the armament and disarmament negotiations was reported by the American delegation today to its advisory committee of twenty-one with a report that detailed reports on various subjects be drawn up for the information of the delegates.

For more than an hour the committee was in conference with Secretary Hughes and afterward Chairman Sutherland assumed specific subjects for investigation by the sub-committees on naval armaments, air, and land forces, and on disarmament. The committee also considered the question of disarmament and the possibility of a general conference to discuss disarmament.

The Far Eastern question will be examined by the sub-committee on disarmament for the purpose of a view to making recommendations particularly with regard to China and to the principles agreed to by the powers yesterday. Representative Stephen G. Porter of Pennsylvania is chairman of this sub-committee.

The sub-committee on general information, headed by William Boyce Thompson, is expected to convene public sentiment on the general work of the conference, including the proposal to reduce submarine strength and the American suggestion for a naval holiday. The sub-committee already has organized a staff to compile editorial opinion and to furnish a digest of recommendations that come from the general public in various other ways.

No specific tasks were set for the committee on new weapons of warfare, headed by Carmel Thompson, but it was requested to collect what information it could for the purpose of the American delegation in dealing with such subjects as poison gas and submarines. The question of new weapons of warfare has not yet been reached on the program of the conference itself, but it was understood that the request for information was made with a view to bringing the question into conference discussions in the near future.
